

Testimony – OPPOSE HB530

## HB530 (Health Occupations-Pharmacists-Administration of Vaccines)

The bill removes the need to have a physician's prescription, removes physician input. 9- to 11-yr olds typically get MANY vaccines at a time, unlike an adult. This could be against medical advice of the child's doctor.

**This bill is really about the HPV vaccine.**

HPV vaccine puts children at risk. Other countries have removed HPV vaccines due to safety concerns. <https://www.judicialwatch.org/corruption-chronicles/japan-halts-hpv-shot-for-girls-over-safety-issues/> <https://sanevax.org/gardasil-international-scandal/>

Vaccines are liability-free products. <https://journalofethics.ama-assn.org/article/national-childhood-vaccine-injury-act-and-supreme-courts-interpretation/2012-01>

It was not tested against a true placebo. Sources: Gardasil 9 package insert <https://www.immunizationinfo.com/wp-content/uploads/Gardasil-9-Prescribing-Information.pdf>

It has never been proven to prevent a single case of any kind of cancer [https://journals.sagepub.com/doi/10.1177/0141076819899308?fbclid=IwAR26ClS2ILH3AH\\_izogy4SNDUP1hvoOV0Ga5n9p-x2BQbQUpzFVUzKKAca](https://journals.sagepub.com/doi/10.1177/0141076819899308?fbclid=IwAR26ClS2ILH3AH_izogy4SNDUP1hvoOV0Ga5n9p-x2BQbQUpzFVUzKKAca)

HPV vaccination can lead to cervical cancer, chart from FDA's 5/18/06 meeting minutes, VRBPAC (Vaccines and Related Biological Products Advisory Committee) showing 44.6% negative efficacy, or **increased** risk <https://www.esculape.com/gynecologie/imagegyneco/gardasil-table%2017.gif>

The age of occurrence for HPV-related cancers is age 50 and older <https://www.cdc.gov/cancer/hpv/statistics/age.htm>

CDC: More than 90% of new HPV infections, including those caused by high-risk HPV types, clear or become undetectable within 2 years. <https://www.cdc.gov/vaccines/pubs/surv-manual/chpt05-hpv.html>

Once a minor turns 18, they can make their own decision to get this vaccine.

Please oppose HB530.
